- \* Possible to watch various remote realtime videos through internet, dedicated line
- \* Our own compression format : KAM is remarkably small in data size, compared with other general video compression technology, and possible to reduce load at file transfer. Requires dedicated playback software for the video, but good for security.
- \* Enables bi-directional video/voice communication by 2 sets “LsBox”
- \* Basic operation by PC, and possible to playback and confirm the scene of the captured video, immediately.

This is a basic system and possible to customize according to requirements.
