

## School education - IT lesson (Children's TV conference system)

Applicable to recital, networking event, mini TV conference, etc. among multiple schools

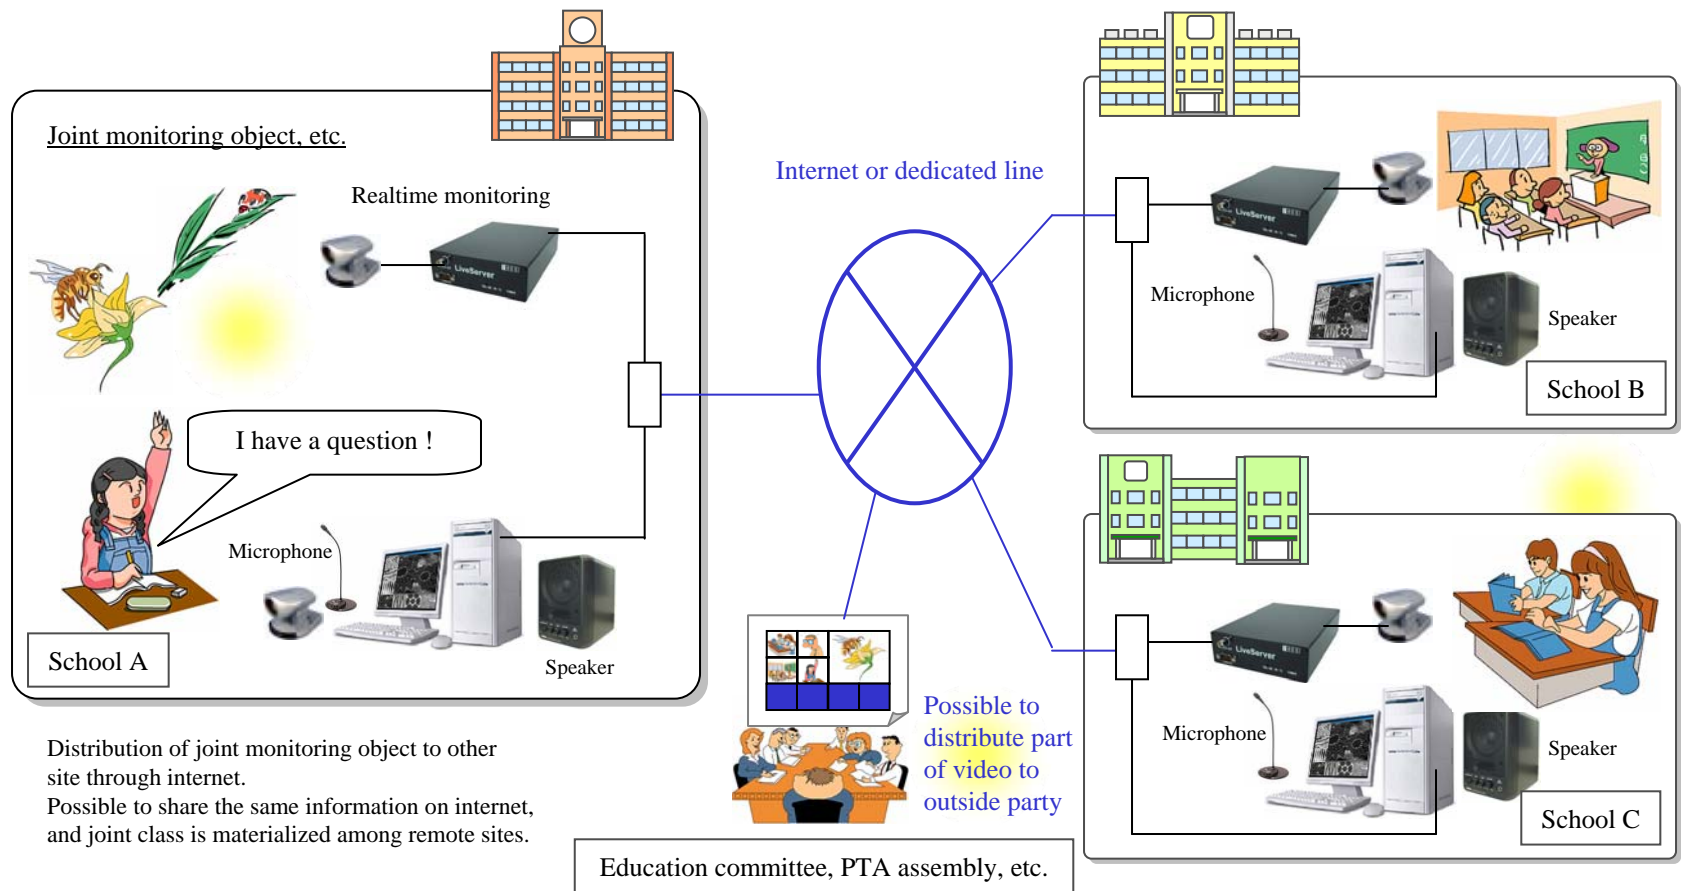

[Remarks]

The application examples published herein, are intended as hints for users for studying potential applications.

Neither guaranteeing the performance nor granting license. Copying or modifying whole or part of the articles shown herein without our prior approval is prohibited by copyright.

- \* Capable of bi-directional realtime video/voice transfer among remote sites through internet, dedicated line.
- \* Our own compression system : KAM is remarkably small in file size, compared with MPEG, and the load on the line can be reduced at file transfer.  
Dedicated software is required at playback, but applicable effectively by security enhancement.
- \* Applicable to bi-directional communication with video/voice through communication by 2 sets “LsBox”.  
Possible to use for TV conference with remote facilities, networking events and live lesson materials.  
Good for reduction of time for preparation, trip, and expenses.
- \* Possible to control electronic lock On/Off, turning illumination On, alarm switch On/Off, through PC screen.

This is a basic system and possible to customize according to requirement
