

## Harbor security monitoring system

Central monitoring, management are possible through videos from multiple sites

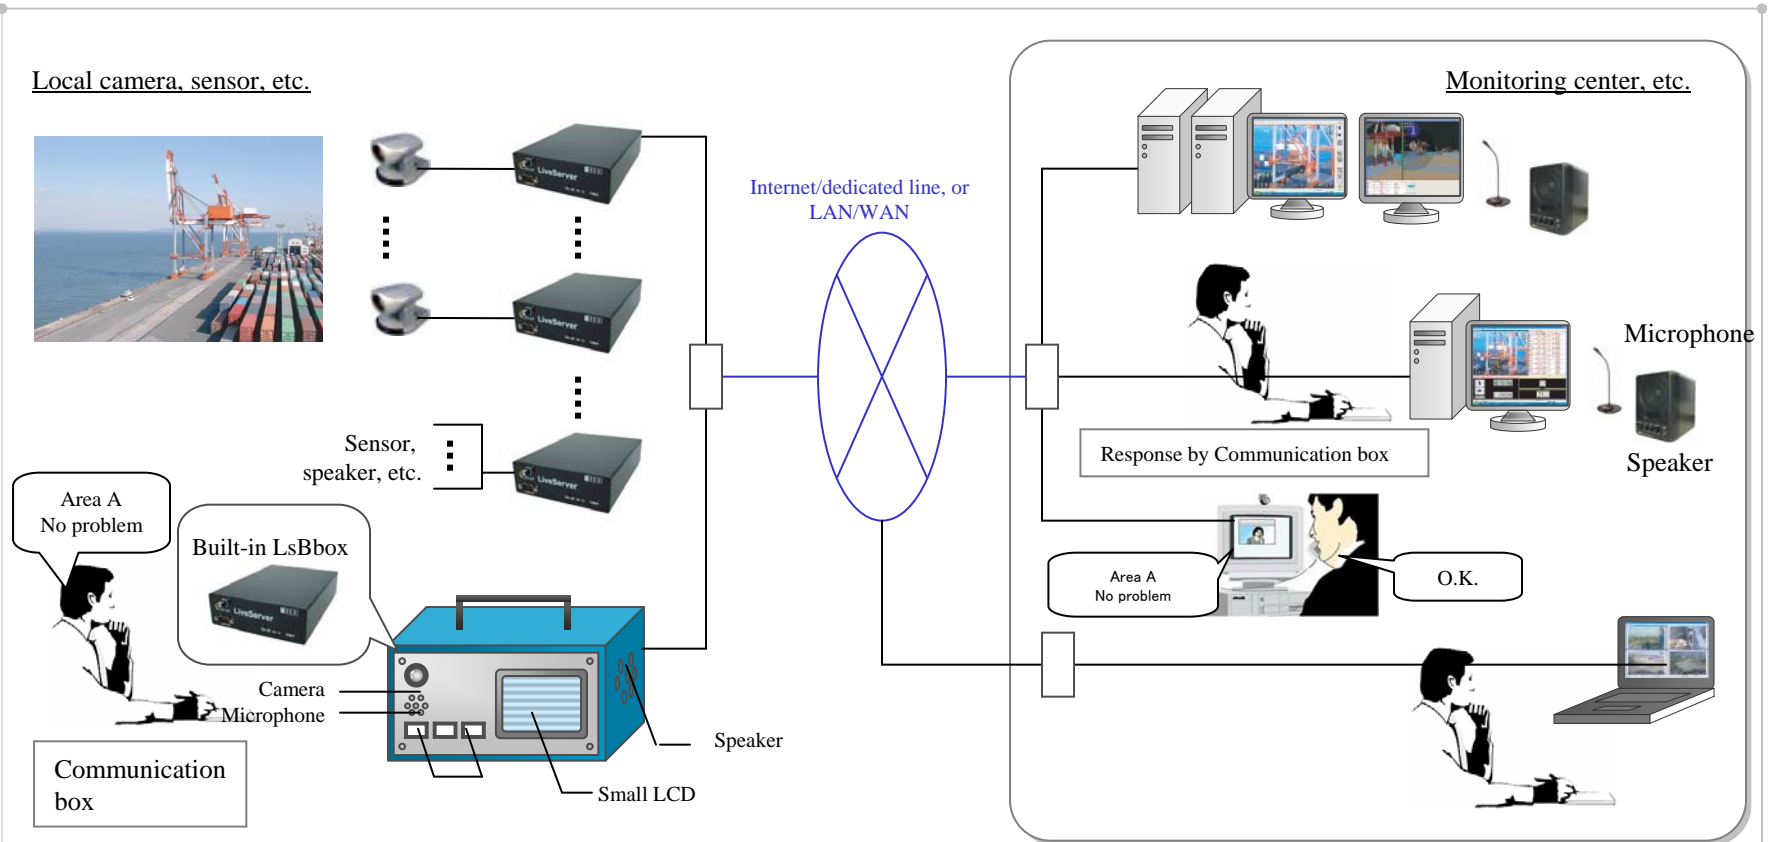

[Remarks]

The application examples published herein, are intended as hints for users for studying potential applications.

Neither guaranteeing the performance nor granting license. Copying or modifying whole or part of the articles shown herein without our prior approval is prohibited by copyright.

- \* Capable of managing the communication through cameras at every site in the area, “communication box, by PC Effective when urgent status understanding, due to bi-directional realtime video transfer
  - \* Video/voice bi-directional communication is possible by connecting “LsBox” and “LsBox” Possible to understand more accurate status with realtime video
  - \* KAM, our own compression format, is much smaller in file size compared with that of MPEG, and reduces stresses in file transferring files
- Although dedicated player software is necessary at playback, effectively applicable with security enhancement
- \* Capable of remote control, control (power switch On/Off, etc.) of electric lock, illumination, alarm, through PC display

This is a basic system, and possible to customize according to requirements like building configuration, facility scale, etc.
