[Remarks]
The application examples published herein, are intended as hints for users for studying potential applications.
Neither guaranteeing the performance nor granting license. Copying or modifying whole or part of the articles shown herein without our prior approval is prohibited by copyright.

＊ Capable of central monitoring of videos through various camera sites in hospital at hospital director's room, secutiry company outside.

Due to realtime monitoring, knowing the intrusion of suspicious person, watching the status after surgery, understanding of initial status,

animals' abnormality, etc. are easy, and counter-actions can be made quickly.

＊ In cooperation with sensor, possible to sense abnormality and trigger capturing video automatically and emit alarm.

Also possible to turn switches of machines On/Off remotely.

＊ KAM, our own compression format, is very small in data size compared with that of MPEG, other general compression

technology, and reduces stress at transferring files through line.

＊ Easy to record, playback and save the captured video, due to PC operation, basically.

Pet hotel, etc.

Camera

LsBox

Conference room, drug depository

Security camera, etc.

Hospital director's room, etc.

Capable of central Monitoring with PC at manager's room
