Restaurant premises management system
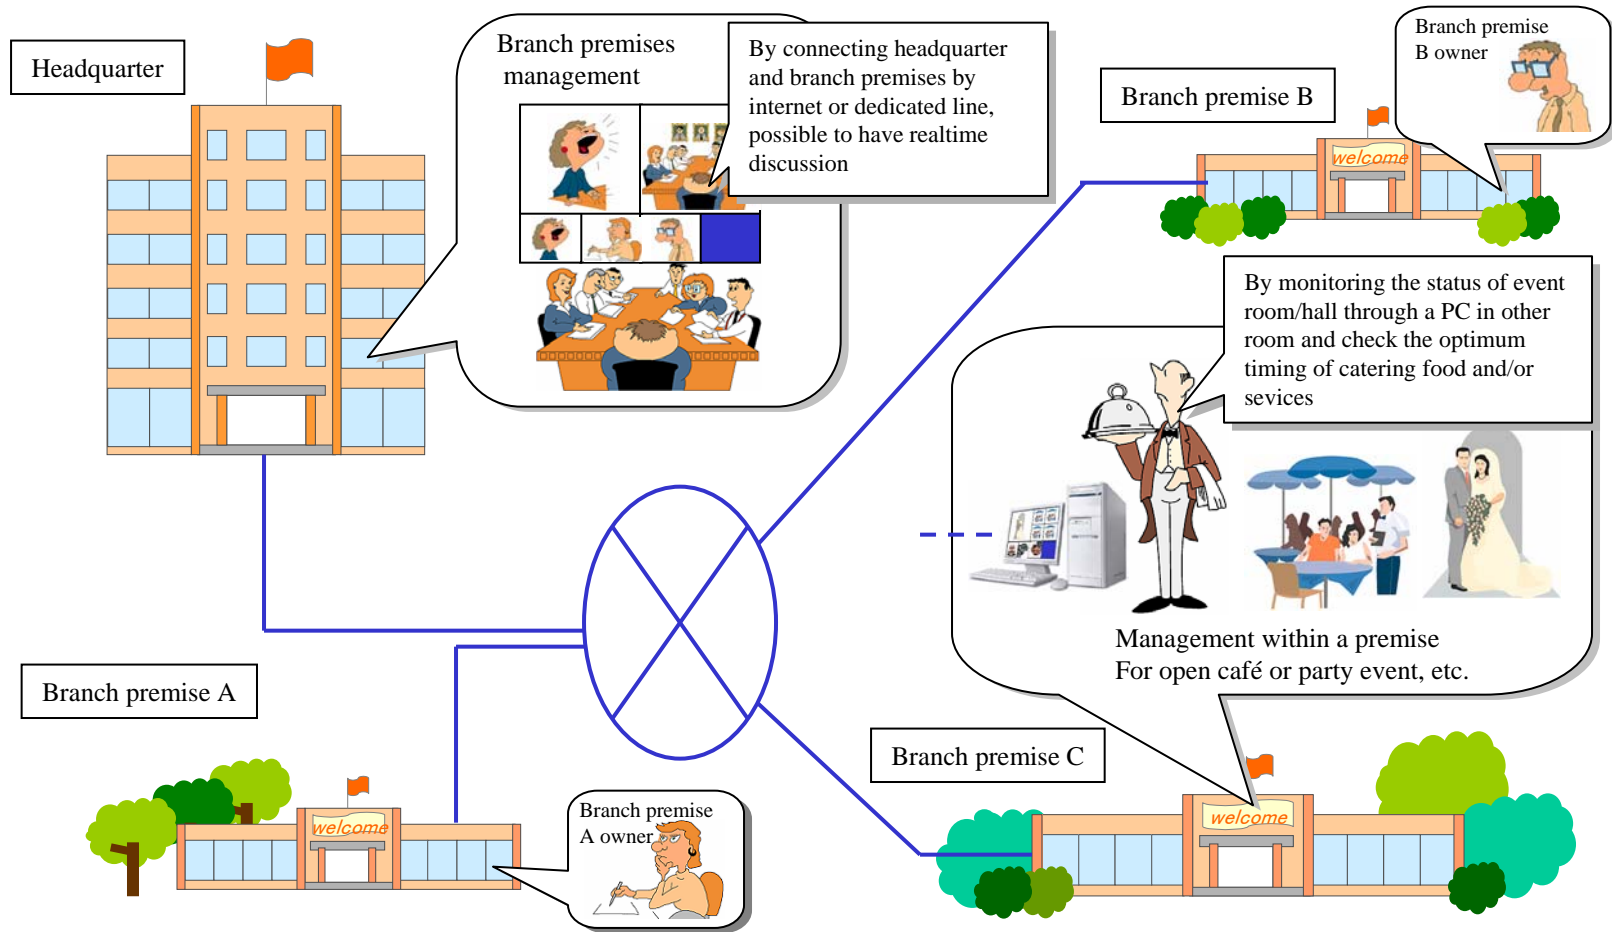

Capable of connecting headquarter and branch premises via live video and voice

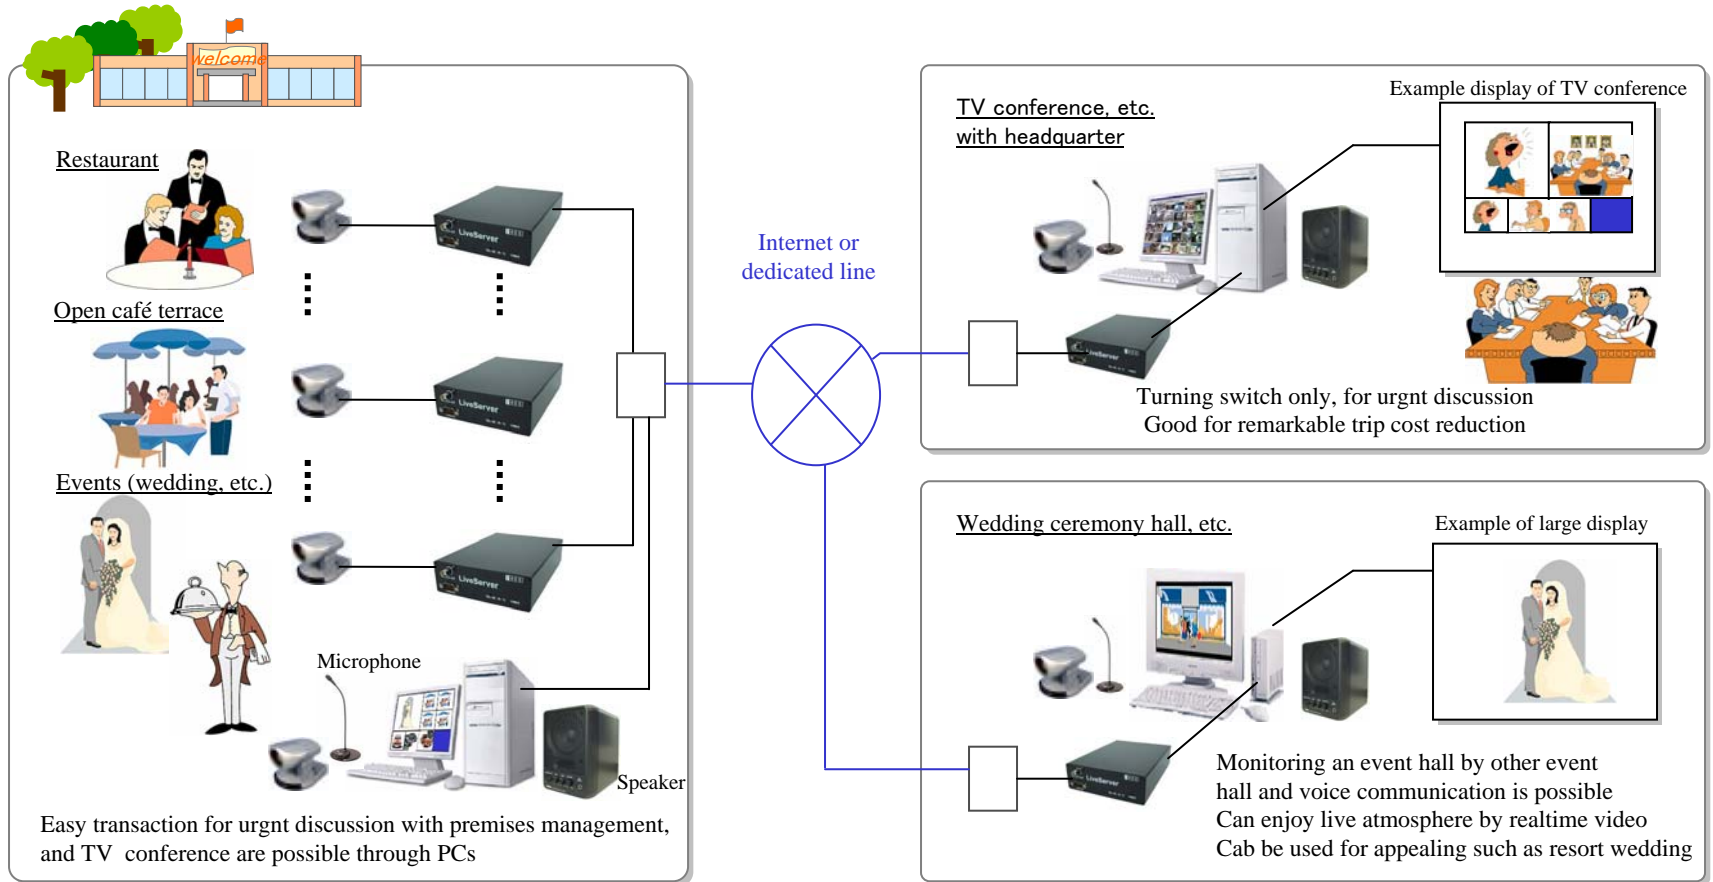

Headquarter

Branch premises management

By connecting headquarter and branch premises by internet or dedicated line, possible to have realtime discussion

Branch premise B

Branch premise B owner

By monitoring the status of event room/hall through a PC in other room and check the optimum timing of catering food and/or sevices

Management within a premise
For open café or party event, etc.

Branch premise A

Branch premise A owner

Branch premise C

welcome

∗ Possible to monitor videos through cameras installed in each premise, with a central PC.

∗ Capable of bi-directional video/voice communication by connecting 2 LsBoxes". More accurate/precise understanding is possible by realtime video. TV conference between H.Q and branch premises is possible through internet or dedicated line.

∗ KAM, our own video format, is very small in file size compared with MPEG, and reduces stresses during file transfer. Requires dedicated playback software, but can be used for security enhancement, effectively.

∗ Capable of locking/unlocking the electronic lock, turning lighting/advertisement, alarm switches on PC screen.
