- * Possible to check the status of child in nursery room by realtime video, staying in other room.
 - * Applicable to attract customers with children, for gym, large scale shopping mall, culture school, etc.
 - * Bi-directional video/voice communication is possible by connecting 2 sets "LsBoxes". Also possible to control turning On/Off of switches of machines remotely.
 - * Applicable to checking people coming in/going out, locking/unlocking of door.
- Reassured because of confirming by monitoring video of real visitor.
- Possible to start recording and emit alarm at sensing abnormality, incooperation with sensor.
- * KAM, our own compression format, is very small in data size, compared with MPEG or other general video compression format, and reduces stresses against line at file transfer.
 - * Basic operation by PC, and easy to record, playback and save the video captured.
 - * For playback, dedicated software is required but can be utilized effectively with security enhancement.

This is a basic system, and possible to customize according to management system.
